CMS Requirements of Participation Phase 3 and Contracted Third Party Management

On November 28, 2019, Phase 3 of CMS' Requirements of Participation for Skilled Nursing Facilities and Long Term Care organizations went into effect. With the requirements comes increased scrutiny around your organization's business, including the need to maintain an effective compliance department and to enforce a Quality Assurance and Performance Improvement (QAPI) plan. A crucial aspect to both of these requirements is proper Contracted Third Party Management.

CMS - Section 483.70

...contracts or other agreements with third parties to provide services or equipment to the facility."

Section 483.70 of CMS' Requirements for LTC Facilities states that the Administration of each organization must conduct a Facility Assessment to determine necessary resources to appropriately care for its residents. This includes all "contracts, memorandums of understanding, or other agreements with third parties to provide services or equipment to the facility". LTC organizations are required to monitor the performance of all contracted third parties to ensure quality care is being given and that the third party is meeting all federal and state regulatory requirements.
